source conversion ro hat connects the upper and lower parts of the Company's business industrial

production. The Cu-Ni

vehicle models in Europe and America are generally equipped with ternary batteries, continuously driving the expansion of overseas demand for ternary materials. According to data from the European Automobile Manufacturers' Association, the sales volume of new energy passenger vehicles in Europe from January to June 2026 was 2.351 million units, up 31.7% year-on-year, and the penetration rate rose to 32.5%. Looking ahead, the trend of electrification and high-end development of new energy vehicles remains unchanged. The battery capacity per vehicle will continue to increase, and the industrialization process of new-generation technologies such as large cylindrical batteries and solid-state batteries will accelerate. At the same time, emerging scenarios such as UAV, low-altitude economy, and embodied AI will continue to expand.

continuous expansion of demand for high-nickel ternary batteries and high-end nickel-based alloys, opening up long-term growth space for the nickel industry.

3. Situation of the cobalt industry

During the reporting period, the tight supply situation in the global cobalt industry persisted. According to SMM, the domestic supply and demand gap for cobalt raw materials was approximately 23,000 metal tons in the first half of 2026, and the market remained in a destocking cycle. On the supply side, the global distribution of cobalt resources is highly concentrated, and major supplying countries have implemented regular export quota control, resulting in a significant shrink in the total circulation volume of global cobalt intermediate products compared with pre control levels.

electrification and intelligence of new energy vehicles will continue to deepen. The energy storage industry has entered a stage of large-scale and rapid development. Industry demand is expected to maintain a high growth rate, and the lithium carbonate market holds broad long-term development prospects.

Description of the Company's new significant non-primary business during the reporting period
□Applicable √Not applicable

II. Business discussion and analysis

In the first half of 2026, in the face of a complex and volatile macro environment and frequent external disturbances in the industrial situation, the Company persisted in the business essence of putting customers at the center and creating value for them, and deeply practiced the development strategy of "one core, two poles and four modernizations". By fully leveraging its comprehensive advantages of industrial integration, technology core-centeredness, internationalized operation, and ecological development, the Company has comprehensively advanced the construction of "Technological Huayou, Green Huayou, Open Huayou, Responsible Huayou, and Striving Huayou". It has gathered the internal driving force for high-quality development through strategic implementation and consolidated the efficiency and benefits of high-volume development through lean operation, achieving the best business performance in the same period of history. The Company has reached a new high in the ranking of the Fortune China 500, laying a solid foundation for a high-quality start to the "15th Five-Year Plan".

In the first half of 2026, the Company mainly completed the following tasks in line with its development strategy and annual business plan:

(I) Continuously released the integrated advantages, and achieved a significant increase in new energy material products

During the reporting period, the Company achieved operating income of RMB 55.568 billion, representing a year-on-year increase of 49.39%, and achieved a net profit attributable to the parent company of RMB 3.507 billion, representing a year-on-year increase of 29.38%, reaching the best level in the same period of history, further highlighting the advantages of the Company's integrated industrial development. In the first half of 2026, the Company focused on the three key elements of quality, cost and efficiency, and made every effort to expand the market, stabilize production and increase efficiency. As a result, the sales volume of new energy material products increased significantly, the shipment volume of ternary cathode materials reached 76,300 tons, up by about 93% year-on-year, and the proportion of ultra-high nickel 9-series products rose to over 70%. The shipment volume of ternary precursors was 80,800 tons, representing a year-on-year growth of approximately 94%. The shipment volume of lithium carbonate was 30,500 tons, increasing by approximately 17% year-on-year. The shipment volume of nickel products was 132,800 tons, basically the same as that of the previous year. The shipment volume of cobalt products was 15,800 tons, a year-on-year decrease of approximately 24%, mainly due to the decline in demand for consumer electronics. Due to factors such as the increase

have been mass-produced and are stably supplied to mainstream customers. The 4.55V tricobalt tetroxide has been successfully introduced into the leading supply chain and continues to lead the high-voltage race. The cathode materials amplify the leading advantages of high-nickel, ultra-high nickel and medium-nickel high-voltage technologies, and actively promote the research and development of diversified new material systems. The ultra-high nickel Ni94 and Ni95 products have passed the 46-series large cylindrical battery certification of leading customers and are the first to enter mass production. The ultra-high nickel products maintain a leading advantage in terms.

acq[illegible] agreem[illegible] h[illegible] e transacti[illegible], the Co[illegible]s self-s[illegible]iciency rate of l[illegible]ed. Hungary, the ternary cathode material project has ente[illegible]g stage. Long-term contracts have been signed with LGES and F[illegible]ume in advance and initiating a new stage of localized manufacturing [illegible]dvancement of major projects, the Company's comprehensive strength[illegible]ource allocation, integrating into global industrial division of labor, and [illegible]ket competition has been continuously enhanced, and the potential for high[illegible] been further accumulated.

(IV) Constantly d[illegible]reform and continuously improved the operational quality

During the report[illegible]pany, guided by the principle of value creation, secured efficiency on the basis of[illegible]nt, closely adhered to the essence of its business to deeply promote management r[illegible]m innovation and process optimization continued to cut costs and control expenses, a[illegible]ed sustained improvement in operational quality. The Company further promoted e[illegible]facturing initiatives targeting extremely-low cost, extremely-high efficiency and ultimate e[illegible]. Strengthened standard cost accounting and monthly dynamic cost analysis, continu[illegible]pened the [illegible]ision of accounting units, and layer by layer, strictly implemented busine[illegible]sibilities, driving down its p[illegible]ion c[illegible] and reac[illegible] lows in the costs of many [illegible]ducts. The Company [illegible]strengthene[illegible]rocurement[illegible]suranc[illegible]nd cost control capabilities, enh[illegible]ed market research and [illegible]strategic reserv[illegible] of raw and [illegible]iliary [illegible]erials such as ores and sulfur, an[illegible] continuously optimized the supplier stru[illegible]re, steadily [illegible]provin[illegible]s supply chain management. [illegible]the Company tightened fund manag[illegible]nt, paid [illegible]ti[illegible] to the safety of capital chain, improved capital utilization efficiency, optimi[illegible] financing structure. It successfully issued the seventh tranche of sci tech innovation bonds worth R[illegible] 1 billion and

and performance level of the management

(V) Advanced the ESG governance in depth, and continuously consolidated the foundation for sustainable development

During the reporting period, the Company continuously deepened its ESG management, released the ESG strategy of “You” all over the world, optimized and integrated the three-level ESG governance structure of “decision-making level, management level and execution level”, clearly defined the three functional positioning of “risk prevention, development promotion and brand building”, and advanced ESG practices around the seven pillars. It improved the closed-loop management mechanism of “access - assessment - rectification - evidence – disclosure” for the mineral supply chain and promoted the transmission of due diligence management requirements to the upstream of the supply chain. In active response to climate change, the Company completed the first TCFD report. It has continued to carry out community development projects in Zimbabwe, Indonesia and the Democratic Republic of the Congo, demonstrating the action and influence of sustainable development. During the reporting period, the Company was included in S&P Global’s “Sustainability Yearbook 2026”, ranked in the A-level tier of its industry in the ESG rating of the London Stock Exchange Group, was included in the Fortune China ESG Impact List for three consecutive years, and was awarded the title of Leading Enterprise in the Golden Bee Corporate Social Responsibility China List and other domestic and international ESG honors.

(VI) Steadily advanced special actions, and boosted confidence through dividends and share repurchases

During the reporting period, the Company de the core concept of “putting investors first”, steadily advanced the special actioni if “imp increasing efficiency and emphasizing returns”, and was committed to enhancing the quality of operation and investment value, sharing the fruits of development with investors.

First, it focused on its core business, and its performance reached a new high. The Company has always focused on the integrated industrial chain of new energy lithium battery materials, adhering to the transformation and development path of “controlling resources at the top, expanding the market at the bottom, and enhancing capabilities in the middle”. It leveraged the advantages of “industrial integration, technology core-centeredness, internationalized operation, and ecological development” to promote high-quality and stable development. During the reporting period, the Company achieved operating incomitm

dividend of RMB 5 (including tax) for every 10 shares, with a total cash dividend of RMB 948 million, truly allowing investors to share the dividends of the Company’s development.

Third, it introduced a share repurchase plan to demonstrate confidence in development. Based on confidence in the

Reasons for changes in R&D expenses: Mainly due to increased R&D investment during the current period.
Reasons for changes in net cash flow from operating activities: Mainly due to the growth in business scale, which contributed to operating cash inflows.
Reasons for changes in net cash flow from investing activities: Mainly due to an increase in investment in ongoing projects
Reasons for changes in net cash flow from financing activities: Mainly due to increased borrowings caused by the expansion of business and investment scale

Note 1: Commitments related to initial public offerings and about horizontal competition

For the purpose of avoiding possible horizontal competition with the Company in the future, safeguarding the interests of all shareholders of the Company and ensuring the Company's long-term and stable development, Huayou Holding, the controlling shareholder of the Company, and Mr. Chen Xuehua (collectively, the "Commitment Makers"), have respectively issued a Letter of Commitment on Avoiding Horizontal Competition (hereinafter "Letter of Commitment") to the Company. The main contents of the Letter of Commitment are as follows:

1. As of the date of the Letter of Commitment, neither the Commitment Makers nor any entity under their control has engaged in or participated in any business or activity that competes directly or indirectly in any manner with the Company's principal business;

2026 Semi-

information related-party transactions in a timely manner in accordance with the legal procedures. We will not use related-party transactions to transfer profits or harm the legitimate rights and interests of Huayou Cobalt and other shareholders.
3. If the Commitment Makers cause any loss to Huayou Cobalt and its relevant shareholders as a result of failure to perform or improper performance of the above commitments, they shall bear such loss in full in cash and be held jointly and severally liable.

Note 4: Other commitments related to refinancing
I. Huayou Holding (the controlling shareholder of the Company) and Chen Xuehua (the actual controller) make the following commitments:
1. After the completion of the transaction, I/the Company will ensure that Huayou Cobalt and its subsidiaries will continue to maintain their independence in terms of assets, business, finance, institutions, and personnel in accordance with the requirements of normative documents including but not limited to the Rules Governing the Listing of Stocks on the Shanghai Stock Exchange.
2. If I/the Company causes any loss to Huayou Cobalt and its relevant shareholders as a result of failure to perform or improper performance of the above commitments, I/the Company shall bear such loss in full in cash.

II. Upon completion of the non-public offering, the directors and senior officers of the Company will continue to faithfully and diligently perform their duties, safeguard the legitimate rights and interests of the Company and all shareholders, and make the following commitments to the effective performance of the Company's measures to make up the gap in accordance with the relevant regulations of the China Securities Regulatory Commission:
1. I undertake to perform my duties faithfully and diligently and to protect the legitimate rights and interests of the Company and all shareholders;
2. I undertake not to give benefits to other entities or individuals free of charge or on unfair terms, and not to harm the interests of the Company in any other way;
3. I undertake to restrict my job-related consumption behavior;
4. I undertake not to use the Company's assets to engage in investment and consumption activities unrelated to the performance of duties;
5. I undertake that the remuneration system established by the Board of Directors or the Nomination and Remuneration Committee is linked to the implementation of the Company's measures to make up the gap;
6. I undertake that the vesting conditions of any equity incentive plans announced will be linked to the implementation of the Company's measures to make up the gap;
7. I undertake to effectively implement the Company's measures to make up the gap and fulfill any commitments I have made regarding the measures to make up the gap. If I violate any of these commitments and cause losses to the Company or its investors, I am willing to bear the liability for compensation to the Company or its investors in accordance with the law;
8. From the date of issuance of the commitments to the completion of the Company's non-public offering of the shares, if the China Securities Regulatory Commission formulates any other new regulatory requirements regarding the measures to make up the gap and their commitments and the above commitments cannot satisfy such provisions of the China Securities Regulatory Commission, I undertake to issue a supplementary commitment in accordance with the latest regulations of the China Securities Regulatory Commission at that time.

III. In order to reduce the impact of the shares issued in this non-public offering diluting the return for the current period and ensure that the measures taken by the issuer to make up the gap can be effectively implemented, I/the

The functional currency of the Company and its domestic subsidiaries is RMB, while the functional currency of subsidiaries engaged in overseas operations is the currency of the primary economic environment in which they operate.

5. Methods for determining and basis for selecting significance criteria

√Applicable □Not applicable

Item	Significance criteria
Significant accounts receivable with provision for bad debts made on an individual basis	Single amount exceeds 0.5% of total assets
Significant provisions for bad debts of accounts receivable collected or reversed	Single amount exceeds 0.5% of total assets
Significant accounts receivable	

Wh

financial assets at fair value through profit or loss.

Financial liabilities are classified into the following categories upon initial recognition: financial liabilities at fair value through profit or loss, financial liabilities arising from the transfer of financial assets which do not qualify for derecognition or when continuing involvement approach applies, financial guarantee contracts, and financial liabilities at amortized cost. (3) financial guarantee contracts fall within the scope of this category. provide a loan at a below-market interest rate, which do not fall within any other category financial liabilities at amortized cost

2. Recognition criteria, measurement method and derecognition of financial assets and liabilities

(1) Recognition criteria and measurement method of financial assets and financial liabilities

When the Company becomes a party to a financial instrument, it is recognized as a financial asset or financial liability. The financial assets and financial liabilities initially recognized by the Company are measured at fair value; for the financial assets and liabilities at fair value through profit or loss, transaction expenses thereof are directly included in profit or loss; for other categories of financial assets and financial liabilities, the transaction expenses thereof are included

liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not active; inputs other than quoted prices that are observable for the asset or liability, for example, interest rates and yield curves observable at commonly quoted intervals; market-corroborated inputs;
(3) Level 3 inputs are unobservable inputs for the asset or liability. Level 3 inputs include interest rate that is not observable and cannot be corroborated by observable market data at commonly quoted intervals, historical volatility, future cash flows to be paid to fulfill the disposal obligation assumed in business combination, financial forecast developed using the Company's own data, etc.

5. Impairment of financial instruments

The Company, on the basis of expected credit loss, recognizes loss allowances of financial assets at amortized cost, debt instrument investments at fair value through other comprehensive income, contract assets, leases receivable, loan commitments other than financial liabilities at fair value through profit or loss, financial guarantee contracts not belong to financial liabilities at fair value through profit or loss or financial liabilities that arise when a transfer of a financial asset does not qualify for derecognition or when the continuing involvement approach applies.

Expected credit losses refer to the weighted average of credit losses with the respective risks of a default occurring as the weights. Credit loss refers to the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the Company expects to receive (i.e., all cash shortfalls), discounted at the original effective interest rate. Among which, purchased or originated credit-impaired financial assets are discounted at the credit-adjusted effective interest rate.

At the balance sheet date, the Company shall only recognize the cumulative changes in the lifetime expected credit losses since initial recognition as a loss allowance for purchased or originated credit-impaired financial assets.

For leases receivable, and accounts receivable and contract assets resulting from transactions regulated in "CASBE 14 – Revenues", the Company chooses simplified approach to measure the loss allowance at an amount equal to lifetime expected credit losses.

For financial assets other than the above, on each balance sheet date, the Company shall assess whether the credit risk on the financial instrument has increased significantly since initial recognition. The Company shall measure the loss allowance for the financial instrument at an amount equal to the lifetime expected credit losses if the credit risk on that financial instrument has increased significantly since initial recognition; otherwise, the Company shall measure the loss allowance for that financial instrument at an amount equal to 12-month expected credit loss.

Considering reasonable and supportable forward-looking information, the Company compares the risk of a default occurring on the financial instrument as at the balance sheet date with the risk of a default occurring on the financial instrument as at the date of initial recognition, so as to assess whether the credit risk on the financial instrument has increased significantly since initial recognition.

The Company may assume that the credit risk on a financial instrument has not increased significantly since initial recognition if the financial instrument is determined to have relatively low credit risk at the balance sheet date.

The Company shall estimate expected credit risk and measure expected credit losses on an individual or a portfolio basis. When the Company adopts the portfolio basis, financial instruments are grouped with similar credit risk features.

The Company shall remeasure expected credit loss on each balance sheet date, and increased or reversed amounts of loss allowance arising therefrom shall be included into profit or loss as impairment losses or gains. For a financial asset measured at amortized cost, the loss allowance reduces the carrying amount of such financial asset presented in the balance sheet; for a debt investment measured at fair value through other comprehensive income, the loss allowance shall be recognized in other comprehensive income and shall not reduce the carrying amount of such financial asset.

6. Offsetting financial assets and financial liabilities

Financial assets and financial liabilities are presented separately in the balance sheet and are not offset. However, the Company offsets a financial asset and a financial liability and presents the net amount in the balance sheet when, and only when, the Company: (1) currently has a legally enforceable right to set off the recognized amounts; and (2) intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

For a transfer of a financial asset that does not qualify for derecognition, the Company does not offset the transferred asset and the associated liability.

2. Determination of investment cost

(1) For business combination under common control, if the consideration of the combining party is that it makes payment in cash, transfers non-cash assets, assumes its liabilities or issues equity securities, on the date of combination, it regards the share of the carrying amount of the equity of the combined party included in the consolidated financial statements of the ultimate controlling party as the initial cost of the investment. The difference between the initial cost of the long-term equity investments and the carrying amount of the combination consideration paid or the par value of shares issued offsets capital reserve; if the balance of capital reserve is insufficient to offset, any excess is adjusted to retained earnings.

When long-term equity investments are obtained through business combination under common control achieved in stages, the Company determines whether it is a "bundled transaction". If it is a "bundled transaction", stages as a whole are considered as one transaction in accounting treatment. If it is not a "bundled transaction", on the date of combination, investment cost is initially recognized at the share of the carrying amount of net assets of the combined party included the consolidated financial statements of the ultimate controlling party. The difference between the initial investment cost of long-term equity investments at the acquisition date and the carrying amount of the previously held long-term equity investments plus the carrying amount of the consideration paid for the newly acquired equity is adjusted to capital reserve; if the balance of capital reserve is insufficient to offset, any excess is adjusted to retained earnings.

(2) For business combination not under common control, investment cost is initially recognized at the acquisition-date fair value of considerations paid.

When long-term equity investments are obtained through business combination not under common control achieved in stages, the Company determined whether they are stand-alone financial statements or consolidated financial statements in accounting treatment:

1) In the case of stand-alone financial statements, investment cost is initially recognized at the carrying amount of the previously held long-term equity investments plus the carrying amount of the consideration paid for the newly acquired equity.

2) In the case of consolidated financial statements, the Company determines whether it is a "bundled transaction". If it is a "bundled transaction", stages as a whole are considered as one transaction in accounting treatment. If it is not a "bundled transaction", the carrying amount of the acquirer's previously held equity interest in the acquiree is remeasured at the acquisition-date fair value, and the difference between the fair value and the carrying amount is recognized in investment income; when the acquirer's previously held equity interest in the acquiree involves other comprehensive income under equity method, the related other comprehensive income is reclassified as income for the acquisition period, excluding other comprehensive income arising from changes in net liabilities or assets from remeasurement of defined benefit plan of the acquiree.

(3) Long-term equity investments obtained through ways other than business combination: the initial cost of a long-term equity investment obtained by making payment in cash is the purchase cost which is actually paid; that obtained on the basis of issuing equity securities is the fair value of the equity securities issued; that obtained through debt restructuring is determined according to "CASBE 12 – Debt Restructuring"; that obtained through non-cash assets exchange

1) these transactions are entered into at the same time or in contemplation of each other;
2) these transactions form a single transaction designed to achieve an overall commercial effect;
3) the occurrence of one transaction is dependent on the occurrence of at least one other transaction; and
4) one transaction considered on its own is not economically justified, but it is economically justified when considered together with other transactions.
(2) Accounting treatments of non-bundled transactions
1) Stand-alone financial statements
The difference between the carrying amount of the disposed equity and the consideration obtained thereof is recognized in profit or loss. If the disposal does not result in the Company's loss of significant influence or joint control, the remained equity is accounted for with equity method; however, if the disposal results in the Company's loss of control, joint control, or significant influence, the remained equity is accounted for according to "CASBE 22 – Financial Instruments: Recognition and Measurement".
2) Consolidated financial statements
Before the Company's loss of control, the difference between the disposal consideration and the proportionate share of net assets in the disposed subsidiary from acquisition date or combination date to the disposal date is adjusted to capital reserve (capital premium), if the balance of capital reserve is insufficient to offset, any excess is adjusted to retained earnings.
When the Company loses control, the remained equity is remeasured at the loss-of-control-date fair value. The aggregated value of disposal consideration and the fair value of the remained equity, less the share of net assets in the disposed subsidiary held before the disposal from the acquisition date or combination date to the disposal date is recognized in investment income in the period when the Company loses control over such subsidiary, and meanwhile goodwill is offset correspondingly. Other comprehensive income related to equity investments in former subsidiary is reclassified as investment income upon the Company's loss of control.
(3) Accounting treatment of bundled transaction
1) Stand-alone financial statements
Stages as a whole are considered as one transaction resulting in loss of control in accounting treatment. However, before the Company loses control over a subsidiary, the difference between the disposal consideration at each stage and the carrying amount of long-term equity investments corresponding to the disposed investments is recognized as other comprehensive income at the stand-alone financial statements and reclassified as profit or loss in the period when the Company loses control over such subsidiary.
2) Consolidated financial statements
Stages as a whole are considered as one transaction resulting in loss of control in accounting treatment. However, before the Company loses control over a subsidiary, the difference between the disposal consideration at each stage and the proportionate share of net assets in the disposed subsidiary is recognized as other comprehensive income at the consolidated financial statements and reclassified as profit or loss in the period when the Company loses control over such subsidiary.

20. Investment properties

Not applicable

21. Fixed assets

(1) Recognition criteria

√Applicable □Not applicable
Fixed assets are tangible assets held for use in the production of goods or rendering of services, for rental to others, or for administrative purposes, and expected to be used during more than one accounting year. Fixed assets are recognized if, and only if, it is probable that future economic benefits associated with the assets will flow to the Company and the cost of the assets can be measured reliably.

(2) Depreciation method

√Applicable □Not applicable

Category	Depreciation method	Depreciation life (year)	Residual value rate	Annual depreciation rate

weighted av]l

30. Employee compensation

Employee compensation includes short-term compensation, post-employment benefits, dismissal welfare and other long-term employee benefits.

(1) Accounting treatment of short-term compensation

√Applicable □Not applicable

The Company recognizes, in the accounting period in which an employee provides service, short-term employee benefits actually incurred as liabilities, with a corresponding charge to profit or loss or the cost of a relevant asset.

(2) Accounting treatment of post-employment benefits

√Applicable □Not applicable

The Company classifies post-employment benefit plans as either defined contribution plans or defined benefit plans.

(1) The Company recognizes in the accounting period in which an employee provides service the contribution payable to a defined contribution plan as a liability, with a corresponding charge to profit or loss or the cost of a relevant asset.

(2) Accounting treatment by the Company for defined benefit plan usually involves the following steps:

1) In accordance with the projected unit credit method, using unbiased and mutually compatible actuarial assumptions to estimate related demographic variables and financial variables, measure the obligations under the defined benefit plan, and determine the periods to which the obligations are attributed. Meanwhile, the Company discounts obligations under the defined benefit plan to determine the present value of the defined benefit plan obligations and the current service cost;

2) When a defined benefit plan has assets, the Company recognizes the deficit or surplus by deducting the fair value of defined benefit plan assets from the present value of the defined benefit plan obligation as a net defined benefit plan liability or net defined benefit plan asset. When a defined benefit plan has a surplus, the Company measures the net defined benefit plan asset at the lower of the surplus in the defined benefit plan and the asset ceiling;

3) At the end of the period, the Company recognizes the following components of employee benefits cost arising from defined benefit plan: a. service cost; b. net interest on the net defined benefit plan liability (asset); and c. changes as a result of remeasurement of the net defined benefit liability (asset). Item a and item b are recognized in profit or loss or the cost of a relevant asset. Item c is recognized in other comprehensive income and is not to be reclassified subsequently to profit or loss. However, the Company may transfer those amounts recognized in other comprehensive income within equity.

(3) Accounting treatment of dismissal welfare

√Applicable □Not applicable

Termination benefits provided to employees are recognized as an employee benefit liability for termination benefits, with a corresponding charge to profit or loss at the earlier of the following dates: (1) when the Company cannot unilaterally withdraw the offer of termination benefits because of an employment termination plan or a curtailment proposal; or (2) when the Company recognizes cost or expenses related to a restructuring that involves the payment of termination benefits.

(4) Accounting treatment of other long-term employee benefits

√Applicable □Not applicable

When other long-term employee benefits provided to the employees satisfied the conditions for classifying as a defined contribution plan, those benefits are accounted for in accordance with the requirements relating to defined contribution plan, while other benefits are accounted for in accordance with the requirements relating to defined benefit plan. The Company recognizes the cost of employee benefits arising from other long-term employee benefits as the followings: (1) service cost; (2) net interest on the net liability or net assets of other long-term employee benefits; and (3) changes as a result of remeasurement of the net liability or net assets of other long-term employee benefits. As a practical expedient, the net total of the aforesaid amounts is recognized in profit or loss or included in the cost of a relevant asset.

[redacted]

√Applicable □Not applicable

1. Basis of the adoption of hedge accounting and its accounting treatment

(1) Hedge includes fair value hedge, cash flow hedge and hedge of a net investment in a foreign operation.

(2) A hedging relationship qualifies for hedge accounting if all of the following conditions are met: 1) the hedging relationship consists only of eligible hedging instruments and eligible hedged instruments; 2) at the inception of the hedge there is formal designation of hedging instruments and hedged item, and documentation of the hedging relationship and the Company's risk management objective and strategy for undertaking the hedge; 3) the hedging relationship meets the hedging effectiveness requirements.

The Company recognizes that the hedging relationship meets effectiveness requirements if the all of the followings are simultaneously satisfied: 1) there is an economic relationship between the hedged item and the hedging instruments; 2) the effect of credit risk does not dominate the value changes that result from that economic relationship between the hedged item and the hedging instruments; and 3) the hedge ratio of the hedging relationship is the same as the ratio of the quantity of the hedged item that the Company actually hedges and the number of hedging instruments that the Company actually uses to hedge that quantity of hedged item, but does not reflect an imbalance between the weightings of the hedged item and the hedging instrument.

The Company shall assess whether a hedging relationship meets the hedge effectiveness requirements at inception and on an ongoing basis. If a hedging relationship ceases to meet the hedge effectiveness requirement relating to the hedge ratio but the risk management objective for designated hedging relationship remains the same, the hedging relationship is rebalanced.

(3) Hedge accounting

1) Fair value hedge

a. Gain or loss on hedging instrument shall be recognized in profit or loss or other comprehensive income, if the hedging instrument hedges an equity instrument [redacted]

Reason for reversal or charge off of the provision for inventory depreciation in the current period
√Applicable □Not applicable
At the balance sheet date, inventories are measured at the lower of cost and net realizable value, with provisions for inventory write-down made on the excess of its cost over the net realizable value on an individual basis. Net realizable value of goods on hand are measured based on estimated selling price less estimated selling expenses and relevant taxes and surcharges; net realizable value of raw materials, work in process and materials on consignment for further processing are measured based on estimated selling price of relevant finished goods less cost to be incurred upon completion, estimated selling expenses, and relevant taxes and surcharges. Current decreases all refer to provision for inventory write-down made in the preceding period but written off in the current period due to sale or use of relevant inventories.

Other change				
Balance as at June 30, 2026	85,283.81	1,200,000.00	1,576,930.85	2,862,214.66

Basis for the division of each phase and proportion of provisions for bad debts
Basis for the division of each phase: Other receivables with an age of less than one year and those owed by related parties within the consolidation scope are considered to have not significantly increased credit risk since initial recognition (Phase I). Other receivables aged between one and two years are deemed to have experienced a significant increase in credit risk but have not yet incurred credit impairment (Phase II). Lastly, other receivables aged over two years and those for which bad debt provisions are made individually are recognized as having already suffered credit impairment since initial recognition (Phase III).

Changes in book balance of other receivables with significant change in the amount of provision for loss in the current period
□Applicable √Not applicable

Amount of provision for bad debts in the current period and the basis for evaluating whether the credit risk of the financial instruments has significantly increased:
